

Human FLT3 Ligand Protein

Cat. No. FLT-HE03L

Description

Source	Recombinant Human FLT3 Ligand Protein is expressed from E.coli without tag. It contains Thr27-Ala181.
Accession	P49771-1
Molecular Weight	The protein has a predicted MW of 17.61 kDa same as Bis-Tris PAGE result.
Endotoxin	Less than 0.1 EU per µg by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE > 95% as determined by HPLC

Formulation and Storage

Formulation	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Dissolve the lyophilized protein in distilled water. Please refer to the Certificate of Analysis for detailed instructions.
Storage	-20 to -80°C for 12 months as supplied from date of receipt. -80°C for 3 months after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background

Flt3 Ligand, also known as FL, is an alpha -helical cytokine that promotes the differentiation of multiple hematopoietic cell lineages. Stimulates the proliferation of early hematopoietic cells by activating FLT3. Synergizes well with a number of other colony stimulating factors and interleukins.

Assay Data

Bis-Tris PAGE

Human FLT3 Ligand on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC

Assay Data

The purity of Human FLT3 Ligand is greater than 95% as determined by SEC-HPLC.

ELISA Data

Human FLT3 Ligand, No Tag ELISA

0.2µg Human FLT3 Ligand, No Tag Per Well

Immobilized Human FLT3 Ligand, No Tag at 2µg/ml (100µl/well) on the plate. Dose response curve for Human FLT3, hFc Tag with the EC50 of 21.7ng/ml determined by ELISA.

Cell Based Assay

Recombinant Human FLT3 Ligand Bioactivity

The ED50 was determined by the dose-dependent stimulation of the proliferation of human AML5 cells is < 2.0 ng/ml. (QC Test)
